

Complex Fiscal Management Made Easy

Dramatically reduce the manpower needed to create usable financial statements. Save time. Reduce errors.

Cayuse state-of-the-art financial management solution supplements the Enterprise Resource Planning (ERP) and General Ledger (GL) systems used in higher education, independent research institutes, and research hospitals. Improve budget spend-down oversight, maintain budgets and balances for multi-year sponsored project, and forecast salary coverage.

Cayuse Financial Management is designed by research industry professionals with 20+ years of experience. Financial Management has allowed Cayuse customers to:

- Create custom reports:
 - Easy-to-read financial summaries
 - Burn rate reports
 - P&L statements
- Operate “stand alone” or interface to existing systems
- Support soft encumbrances and calculate indirect cost encumbrances
- Provide reports for the fiscal oversight of individual funds, research teams, and org units
- Forecast personnel costs

FEATURE	BENEFIT
Manages institutional funds, hard money, clinical income, clinical trials, etc.	Monitor the overall fiscal health of the organization.
Interfaces to existing systems including: ERP, GL, payroll, and various purchasing systems.	Save time and reduce the chance of error.
Provides superior reporting. Computes and encumbers projected salaries and benefits for individual budget periods.	Helps users quickly identify potential budgetary or compliance risks.
Integration is accomplished via recurring software import procedures configured by Cayuse.	Data processing is automated – we take care of the integration, so you don’t have to.
Includes cost accounting functionality for tracking internal commitments.	Tracks internally sponsored research and start-up packages.
World Class Support.	98% customer satisfaction.

Financials is designed for integration with the ERP, General Ledger (GL), payroll, and various purchasing systems used in most research and academic environments.

- Apply the appropriate data mapping, error detection, and transaction processing rules
- Load the transactions into Financials
- Allow the transactions to be accessed, viewed, and utilized in display screens and reports

Cayuse is dedicated to delivering and supporting user-friendly solutions that simplify research administration so that the world’s brightest minds can focus on discovery, not paperwork. We are passionate about serving the research community through mindful product creation, dedicated service and a commitment to improving and enriching our world.
