

# Pre- and Post-Award Management in One System

Save time and improve effectiveness by gaining visibility into funding portfolios

GRM (Grant and Research Management) is our research administration and grant management software module is ideally suited for universities, colleges, individual departments, and other research centers with modest funding.

It provides administrators and key personnel with access to crucial information about their grants and research projects for optimal day-to-day management and periodic review of their funding portfolios.

## Pre- and Post-Award Management in One System

- Quickly gain a more complete and accurate picture of your funding portfolio
- Monitor internal processes and maintain sponsor compliance
- Dashboards, filters, and powerful reporting engine
- A single grant management software system provides both administrator and key personnel portals

FEATURE	BENEFIT
Dashboard that provides graphic visualization of active and pending grants.	Quickly monitor active and pending grant funding, performance matrices, and upcoming reporting deadlines.
Automated emails that notify appropriate personnel of upcoming and past due deadlines.	Reduce missed deadlines. Improve project management capabilities with an automated notification system.
Manage and associate publications to awards.	Track and understand which publications have been grant funded immediately.
Key information organized for easy review for single- and multi-year grants.	Save time by getting important information when needed.
Compliance and internal issues tracking.	Reduce the worry. Receive compliance notifications so issues can be taken care of as soon as possible.
World Class Support.	98% customer satisfaction.

GRM handles a wide range of funding mechanisms — from the simplest awards to complex, multi-year program project grants — and can be tailored to meet institution specific needs. Other key features include:

- Predefined report formats for funding, other support, and compliance management.
- Powerful user definable filters for locating subsets of grant information and report creation
- Document management
- Sub-recipient monitoring
- Data access and edit capability controlled by multi-tiered security system

Cayuse is dedicated to delivering and supporting user-friendly solutions that simplify research administration so that the world's brightest minds can focus on discovery, not paperwork. We are passionate about serving the research community through mindful product creation, dedicated service and a commitment to improving and enriching our world.

# eHealth Africa meets grant objectives and improves response rates from team members across multiple countries.

## Challenge

eHealth Africa (eHA) is a global organization focused on advancing public health in the most sensitive parts of the globe. This multi-nation grant management team based out of Nigeria, Sierra Leone, Liberia, Guinea, Germany, and the United States coordinates and provides oversight to projects performed in remote areas throughout Africa. This challenging environment has created a unique set of conditions necessitating an integrated system for tracking grant management data, compliance requirements, deadlines, and deliverables.

Initially, the eHealth grant managers used Google Docs to store spreadsheets and other documents for tracking grant information. As the organization grew in size and complexity, the need for a comprehensive grant management software system quickly became apparent.

## Solution

All agreed the product selected must be web-based and user-friendly to ensure information was accessible to everyone. To meet these requirements, eHealth Africa selected and implemented Cayuse Grant Management. Cayuse provides a web-based system with a dashboard and user-friendly interface with project data organized by tabs for frequently accessed information in user-obvious data groups. It includes document management functionality, an automated email alert system that generates reminders to appropriate personnel, and a comprehensive reporting system.

## Result

The automated reminders generated through the software have been extremely helpful with meeting deadlines and generating quick responses from team members charged with monitoring time sensitive deliverables. This has increased efficiency and enhanced relationships among team members.

Before acquiring Cayuse Grant Management, eHA lacked a one stop depository for documents, reports, and communication. Now they can track proposal documents, identify who is involved in the project, track objectives, and manage deliverables with this centralized system.

## About eHealth Africa (eHA)

eHA was founded in 2009 as a global organization with a mission to "...build stronger health systems through the design and implementation of data-driven solutions that respond to local needs and provide underserved communities with tools to lead healthier lives." To fulfill their mission, eHealth developed external partnerships and received numerous grants to fund efforts for preventing Ebola, HIV, and Polio in addition to improving Emergency Preparedness and Nutrition.

---

*"Cayuse's technology has allowed our entire team to become more organized. Improved organization has been a factor in allowing us to prepare more proposals which has in turn helped increase our funding. All of these factors contribute to the eHealth mission of better serving humanity and helping underserved communities lead healthier lives."*

—**Olakunle Ajayi (Ola)**, eHealth Africa Grants Officer
