

A web-based tool to optimize animal facility staffing and scheduling

eSirius Resource Scheduling enables:

EFFICIENT SCHEDULING

- Auto-generate electronic daily schedules with alerts for potential problems
- Manage PTO requests/approvals and OT availability/assignments
- Plan using projections on staff fluctuations during holidays
- Delegate scheduling responsibilities to appropriate staff

GREATER RESPONSIVENESS

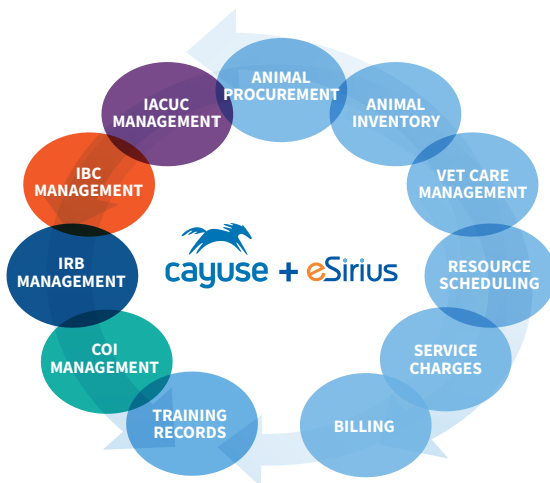

- Access daily schedules on mobile devices
- Use the Daily Planner to quickly respond to events such as call-outs and ad-hoc activities
- View daily plan changes automatically reflected on staff's mobile schedules
- Develop and execute emergency plans
- Report issues in real-time on mobile devices

TRANSPARENCY

- Monitor ongoing daily progress with real-time dashboard

IMPROVED ANALYTICS

- Use current animal inventory and task metrics to estimate staffing requirements
- Produce on-demand reports to view historical trends and operational efficiencies as well as have quick access to records for site inspections
